Skills

- Experience designing and implementing enterprise scale web applications as a member of an agile team.
- Expertise in languages and tools including Python, JavaScript, TypeScript, Bash, PostgreSQL, CSS, React, Material UI, Node.js, Flask, FastAPI, Next.js
- Experience building pipelines for deployment using Google Cloud Platform
- Experience with versioning, build, and packaging tools, including Git, Github, and Docker

Experience

Game Developer - University of North Carolina at Asheville *Jan. 2025 - July 2025*

- Designed and developed game features and user interface elements for a third-person shooter video game using Unreal Engine 5, C++, and Blueprints Visual Scripting.
- Implemented controller support for multiple input devices.
- Engineered procedural generation system to dynamically assemble prefabricated room modules into level layouts.
- Utilized Git for version control and collaborative development across a distributed team.

Software Developer Intern - Croquet Corporation *May 2022 - Aug. 2022*

- Developed features for the Croquet Microverse Javascript library, a framework for building multiplayer immersive 3D virtual worlds on the web, built using Three.js, Croquet OS, and Worldcore framework.
- Developed a 3D racing game using Croquet Microverse as part of a cross-functional, agile, test-driven team.

Projects

PandaMaps - A TTRPG Map Generator

- A web application which procedurally generates battlemaps for Dungeons and Dragons and other Tabletop Role-Playing Games (TTRPG), based on user input.
- Built in React, containerized using Docker, and deployed using Google Cloud Platform.
- Uses procedural generation techniques including OpenSimplex noise and rectangle accretion to generate unique maps.

Platycrawl

- A dungeon-crawler roguelike video game, which utilizes procedural generation techniques such as Perlin noise and randomized room accretion to create game levels.
- Developed in Python, using the NumPy, OpenSimplex, and TCOD libraries.
- Built for distribution using PyInstaller and hosted on itch.io.

Education

University of North Carolina at Asheville - Asheville, NC *Graduated May 09, 2026*
B.S. Computer Science, Concentration in Information Systems
